

Deluxe Saddle Chairs

The Deluxe Saddle Chairs are commonly used in Sonography, Dentistry and Surgical environments. The ergonomic design promotes positive posture by encouraging pelvic tilt whilst the user straddles the stool with both feet firmly on the floor and body weight is distributed through the thighs. The 2 lever mechanism operates and adjusts the seat height and tilt. All models feature a polished aluminium five star base and castors, with option of foot height control. An optional matching back support is also available if required.

Models

- MC6107** Deluxe saddle chair - standard model

Saddle Stools

The new Coccyx Saddle Stool has a cut-out at the rear of the stool to reduce tail-bone pressure and pain during long seated procedures. The curved seat pad design provides a similar ergonomic seated position to the general saddle stool. Both the standard and the coccyx stools have a similar design to the deluxe saddle chairs, designed to encourage positive posture throughout seated procedures. The 2 lever mechanism operation provides independent adjustment for the seat height and tilt. All models feature a polished aluminium five star base and castors.
